

New Rodman 33 Offshore: top level performance

At the end of this year, Rodman will launch a new model of open boat, central console style, combining to perfection all its experience in building high speed professional boats and its knowledge in design and building leisure crafts and fisher-cruiser boats.

The new Rodman 33 Offshore is a new concept craft, inheriting all the differential attributes of the Rodman crafts: strength, seaworthiness, building quality, functionality and great performance suitable for the requirements of this type of boat.

New Rodman 33 Offshore: perfect balance among experience, know-how and innovation.

The technical and development teams in Rodman have managed to perfectly combine the know-how of the Shipyard, its experience and building quality with the design elements necessary for the conception of a new model as well as maintaining the Rodman attributes. This new model will be launched as a very competitive and complete option within the 10-11 m. length range of outboard boats, with central console and open type.

The result, the new Rodman 33 Offshore range is a balanced and complete boat, capable of reaching more than 45 knot with the security and comfort typical to the boats Rodman provides.

A versatile craft, conceived for a wide variety of customers, by her own conception, by its own space definition and different options available that allow the boat to be configured according to the main features required by the Owner.

The new Rodman 33 Offshore will become the best choice for those who are looking for an affordable alternative but without compromising the quality and prestige of the Rodman boats. A high speed boat, with wide and comfortable spaces outside, to enjoy navigation and a comfortable spaces inside to ease stay on board.

No doubt, this is a different boat: functional and comfortable at the same time, powerful and strong, capable of providing excellent seaworthiness and high speed.
